COMMODITY TRADE BY INDUSTRIAL SECTOR WITH THE EEC (9)

Historical Summary 1966-1981

Presented is a review of Canada's commodity trade classified by the principal industrial sector in 1981. The compilation also shows exports and imports and re-exports between values.

Canada's commodity trade statistics are recorded and tabulated by Statistics Canada following a commodity classification. In this report, these data have been allocated to the most appropriate industrial sector, as exports or the industrial sector, and have been grouped into commodities in Canada, which could be used to produce a summary of Canada's commodity trade.

The report is divided into two parts. The first part presents a summary of Canada's commodity trade with the EEC (9) for the period 1966-1981. Particular commodity groups which have been identified at various points in the table.

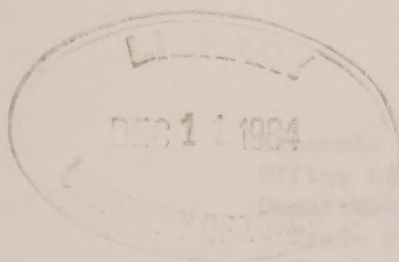

It should be noted that the data for 1981 included in the data for 1981, and the data for 1981 should not be used to compare the data for 1981. The data for 1981 is only partially complete as a result of a reporting delay.

This report, produced from Statistics Canada's industrial sector data, supplements the previous "Commodity Trade by Industrial Sector: Historical Summary, 1966-1981" issued by the Economic Intelligence Branch, Economic Policy and Statistics, Department of Industry, Trade and Commerce in July 1981.

COMMODITY TRADE BY INDUSTRIAL SECTOR WITH THE EEC (9)

Historical Summary 1966-1981

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1981. The tabulations show total exports (including re-exports), total imports and re-exports customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e., exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries in Canada which could or would produce or manufacture these commodities in Canada.

The revised 1970 Standard Industrial Classification issued by Statistics Canada in December 1970 is the framework used. Particular commodity groups within industries are also shown at various points in the tabulation.

It should be emphasized that although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1980" issued by the Economic Intelligence Branch, Economic Policy and Analysis, Department of Industry, Trade and Commerce in July 1981.

COMMODITY TRADE BY INDUSTRIAL SECTOR WITH EEC (10)

Historical Summary 1966-1983

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1983. The tabulations show total exports (including re-exports) and total imports on a customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e., exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries in Canada which could or would produce or manufacture these commodities in Canada.

The revised 1970 Standard Industrial Classification issued by Statistics Canada in December 1970 is the framework used. Particular commodity groups within industries are also shown at various points in the tabulation.

It should be emphasized that although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1982" issued by the Statistical and Data Base Services Directorate, of the then Regional and Industrial Policy and Small Business, Department of Industry, Trade and Commerce/Regional Economic Expansion in August, 1983.

COMMODITY TRADE BY INDUSTRIAL SECTOR WITH EEC (10)

Historical Summary 1966-1984

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1984. The tabulations show total exports (including re-exports) and total imports on a customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e. exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries which could or would produce or manufacture these commodities in Canada.

The revised 1970 Standard Industrial Classification issued by Statistics Canada in December 1970 is the framework used. Particular commodity groups within industries are also shown at various points in the tabulation.

It should be emphasized that, although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1983" issued by the Statistical and Data Base Services Directorate, Department of Regional Industrial Expansion in the Fall of 1984.

COMMODITY TRADE BY INDUSTRIAL SECTOR WITH EEC (10)

Historical Summary 1966-1985

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1985. The tabulations show total exports (including re-exports) and total imports both on a customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e. exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries which could or would produce or manufacture these commodities in Canada.

It should be emphasized that, although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1984" issued by the Statistical and Data Base Services Directorate, Department of Regional Industrial Expansion, in the Summer of 1985.

For the 1985 update presented here the sectoral trade statistics have been rebased to the 1980 Standard Industrial Classification (SIC) as issued by Statistics Canada in December 1980. Since the 1980 SIC's already provide somewhat greater detail, we have adhered more to the formal classifications than was the case with our previous 1970 SIC based reports. In a few cases however, we have again created special SIC definitions to better utilize the detail provided by the commodity trade classifications. The descriptions of the additional sectors we have introduced are prefixed by an "*" in the tables.

It should also be noted that in our review of the commodity allocations for the establishment of the concordance with the 1980 SIC's, changes were made which in a few cases cause a significant shift in the value of trade between sectors (when compared to the previous 1970 SIC based tables). In the tables presented here, the changes to the commodity allocations have been applied on a consistent basis back to 1966. Users should note that in light of rising printing costs, in the future we will only be publishing the trade statistics for the most recent five-year period. The current reports should therefore be retained for the historical series.
